

# *A+ Interactive Software*

What's New?

# Video Formats Supported

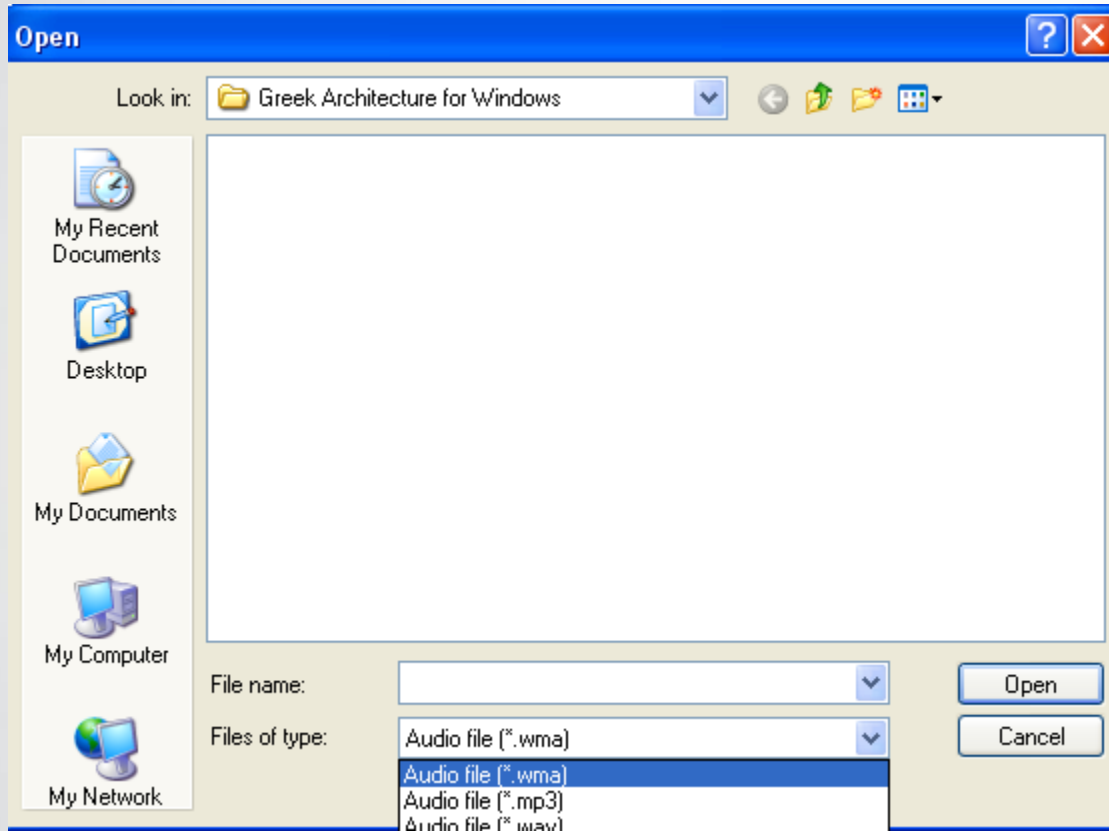

**A+ 1.5 and above supports the following formats:**

**-AVI**

**-WMV**

**-FLV**

# Audio Formats Supported

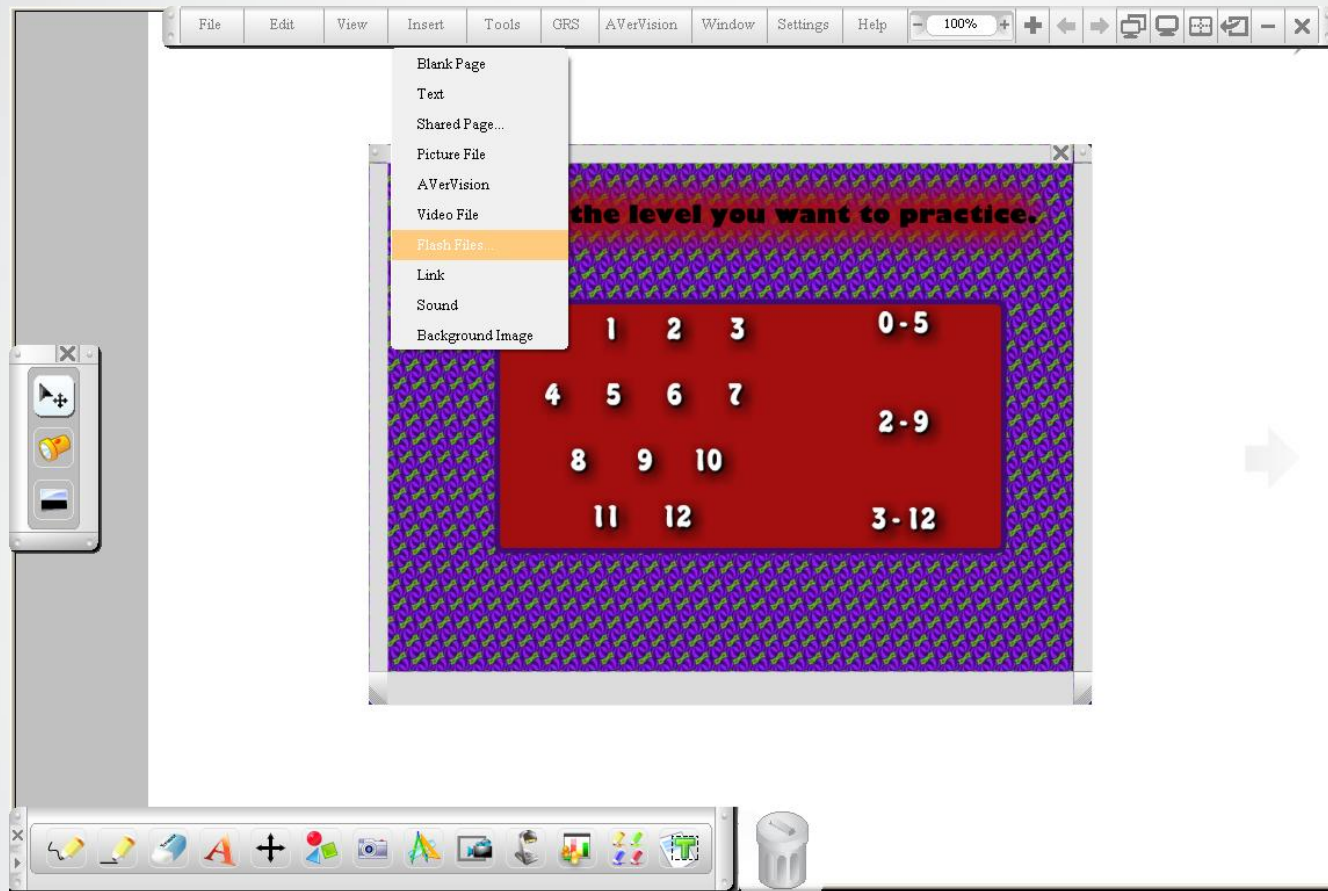

**A+1.5 and above supports the following formats:**

**-WMA**

**-MP3**

**-WAV**

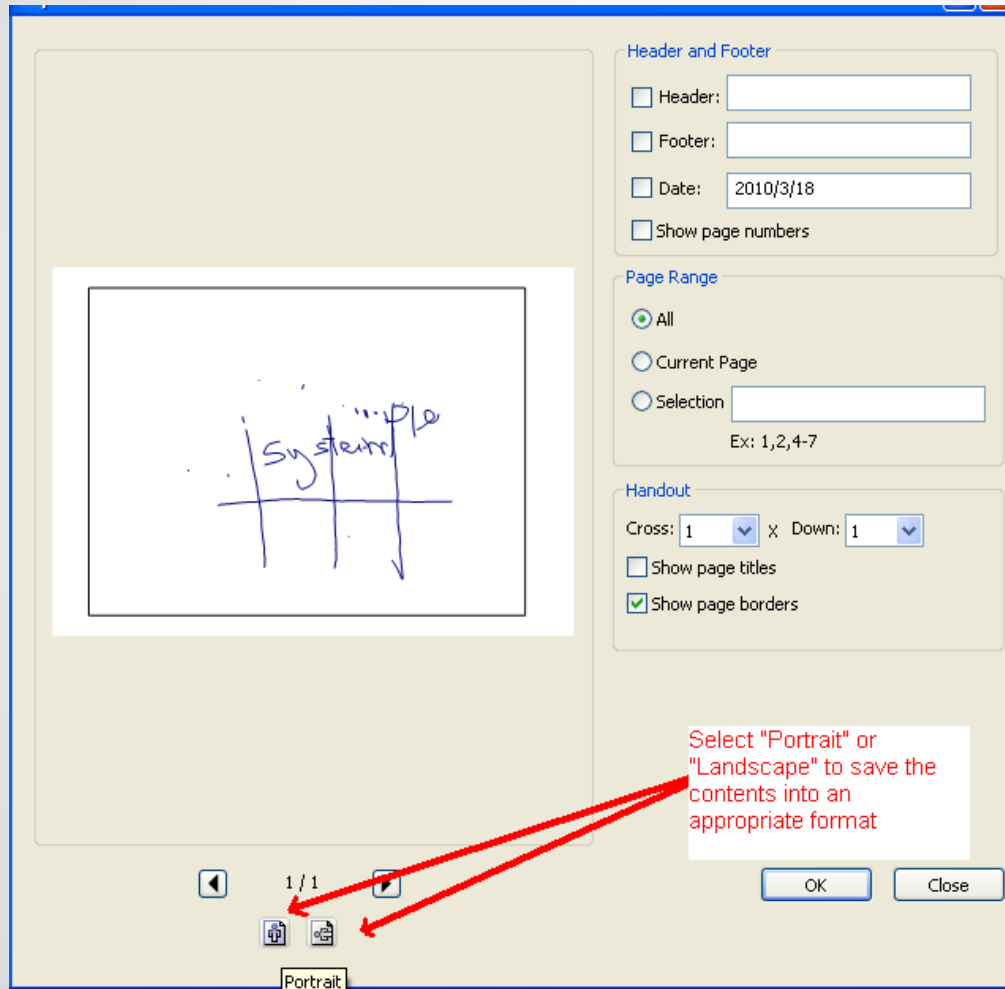

# Flash (.swf) support

**Two ways to work with Flash objects:**

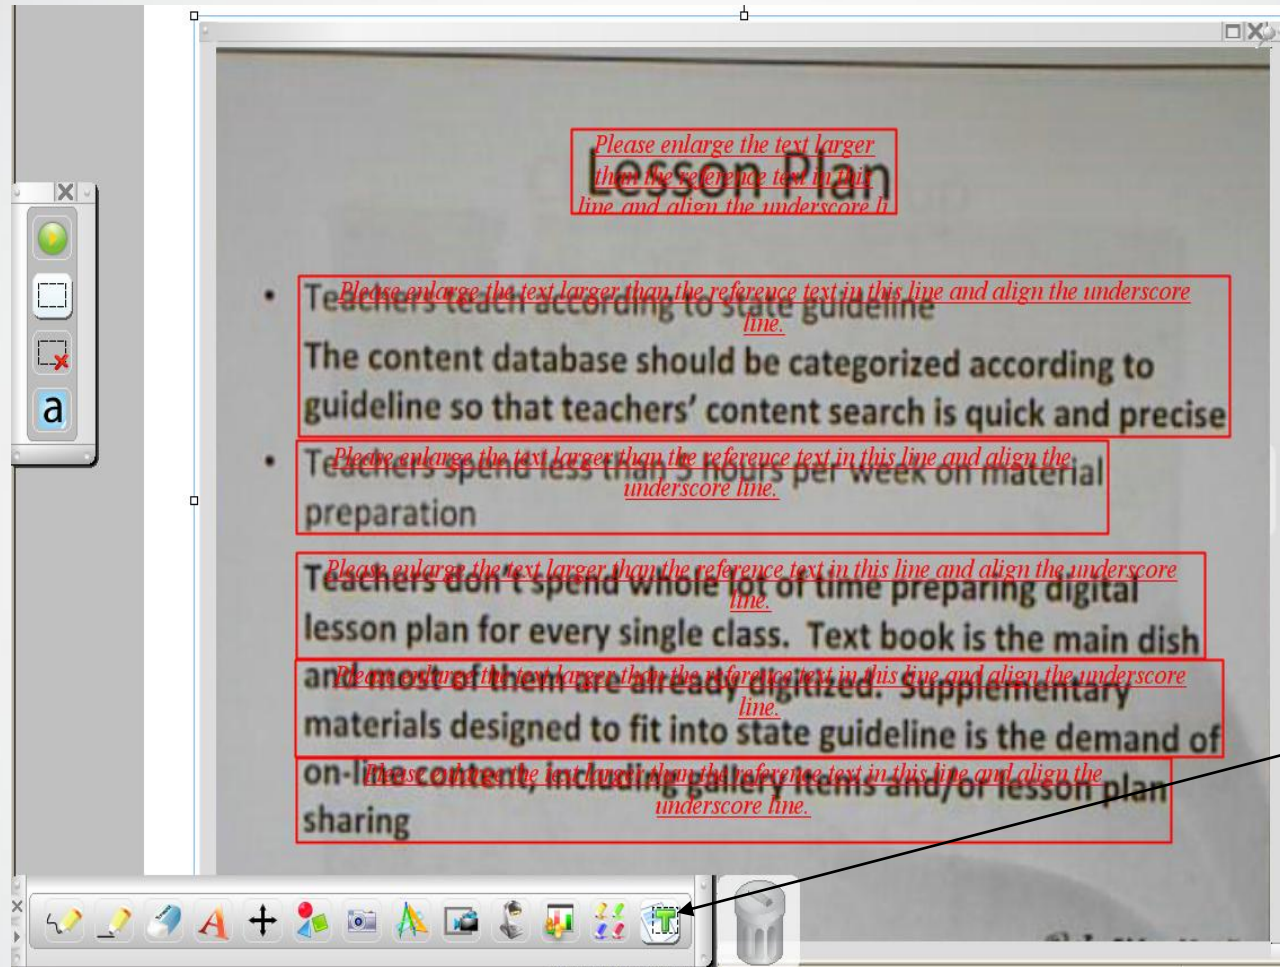

- 1. Insert flash objects directly into your workspace.**
- 2. Import into Resource Library.**

# Export to PDF (Export into Portrait or Landscape)

**- You can now export lesson plans from the .avp format into a PDF (Landscape format or Portrait format)**

# OCR Technology

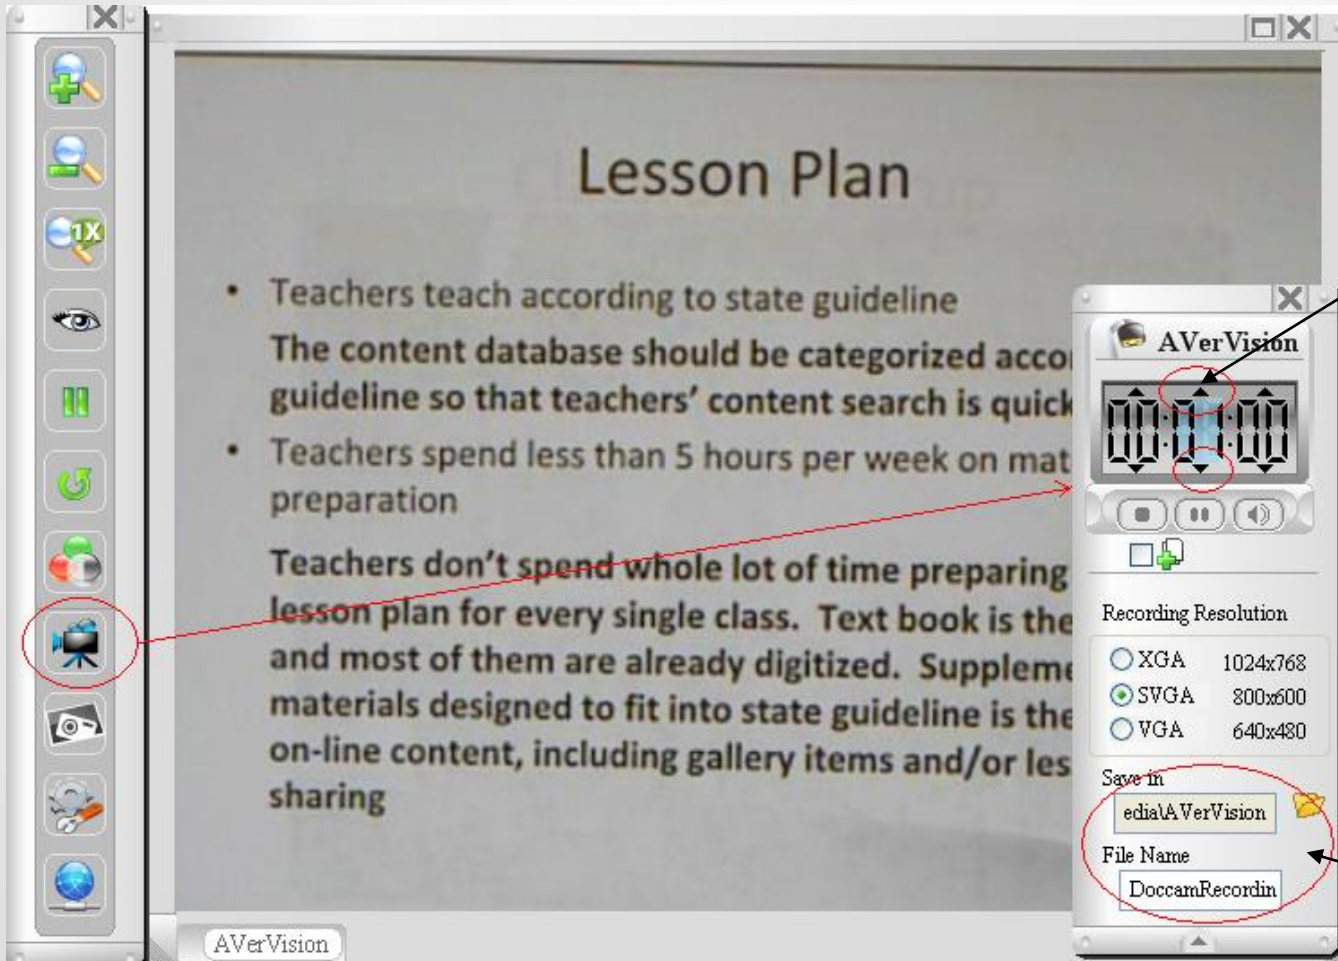

OCR

-Extracting text from a document via the AVerVision Document Camera is now made easy

-Tips: Create multiple recognition boxes (See picture above) for the best recognition rate

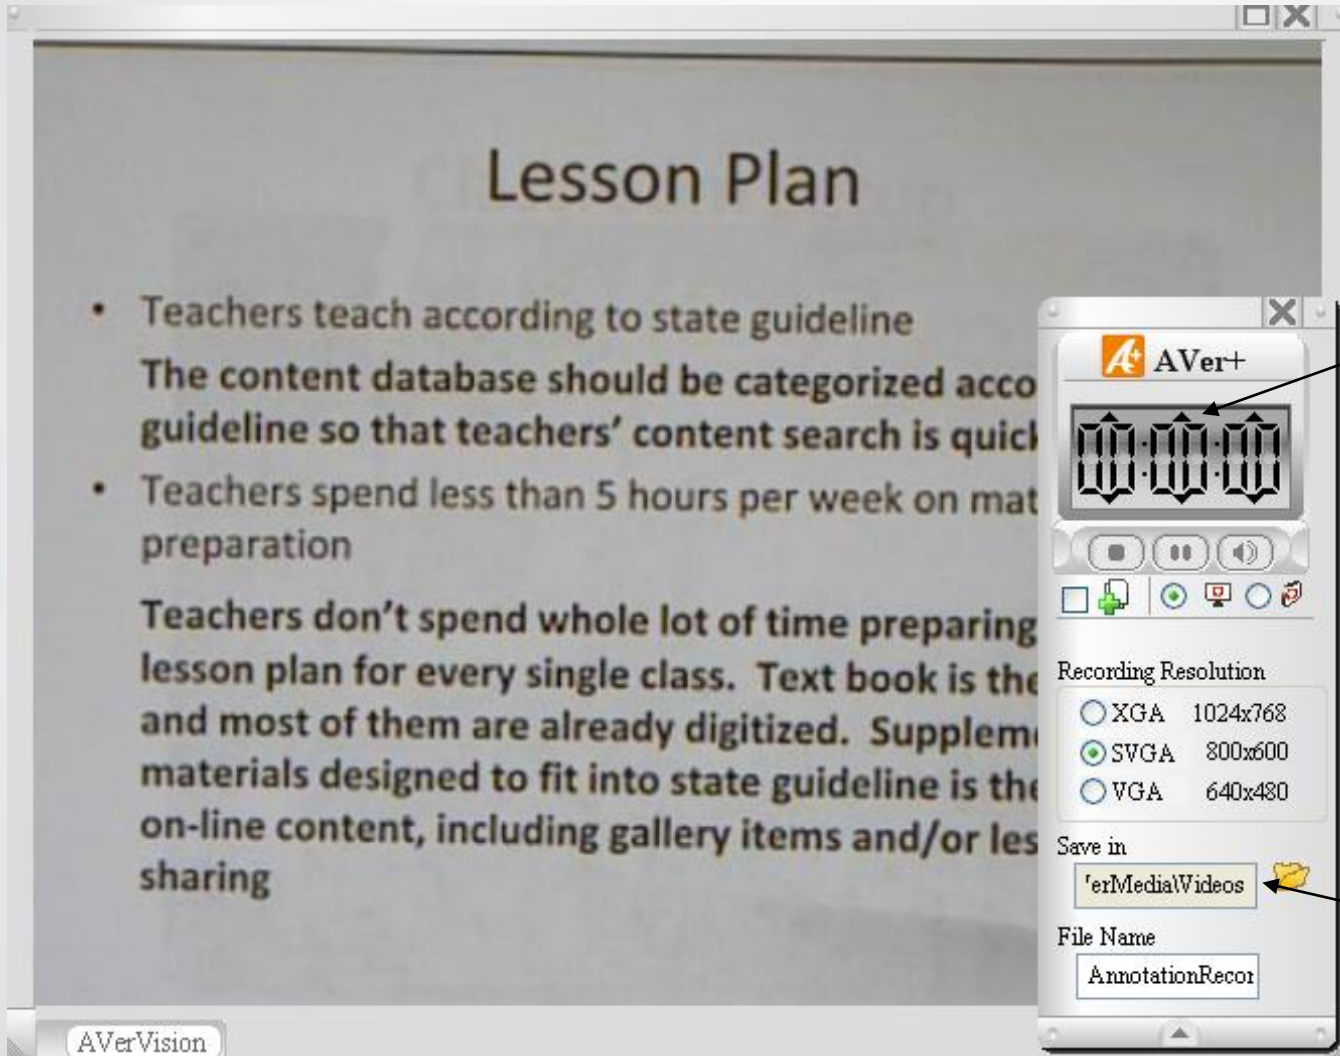

# Improved AVerVision Recording Settings

Set total recording time

Save in desired folder

# Improved A+Recording Settings

Set total recording time

Save in desired folder

## Improved Virtual Transparency Mode

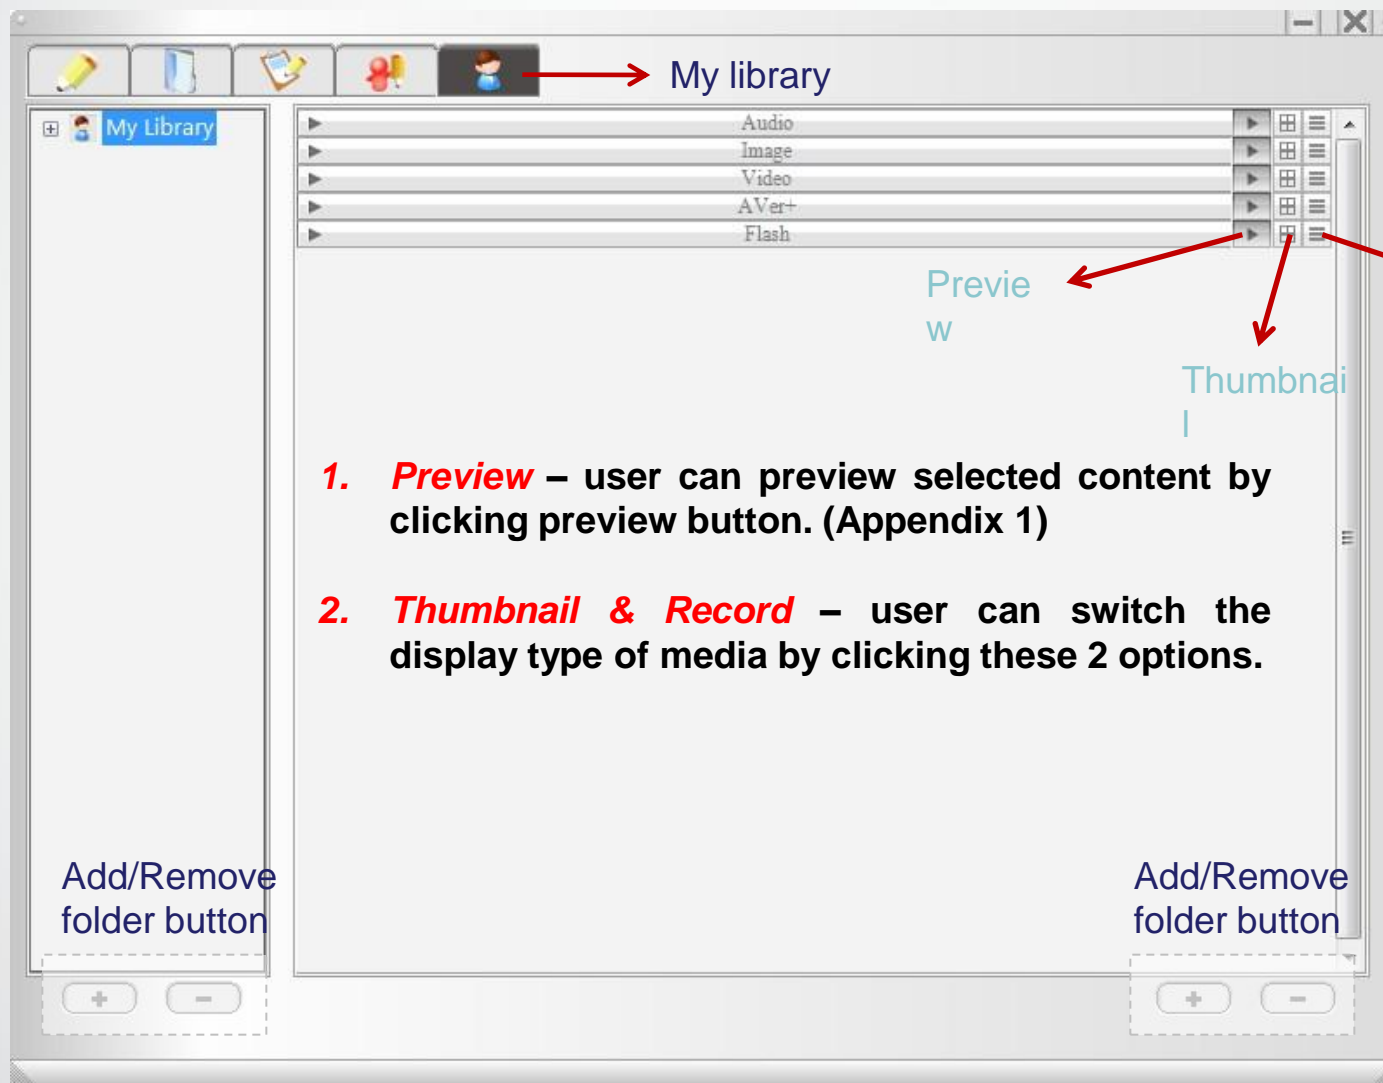

**You can now exit the Virtual Transparency Mode by clicking on the “exit” button (as shown) to get back to your regular workspace.**

# Resource Library

## Resource Library

- **Easy storage** – build up your storage. Once you need access to a resource, just drag it from the ***Resource library*** and put it onto the workspace as needed.
- **Easy & effective preparation** - Gives you a consolidated area to store all your resources such as videos, audios, flash and A+files.
- **Time saving** – once the resource database is built up, you can recall it quickly.

# Resource Library

My library

My Library
