

How to Use the AVerVision Flash Plug-in with Mimio Notebook (Mac)

1. Install the AVerVision Flash Plug-in application by double clicking the zip file, then double click the “AVerVision Flash Interface for Mac” MPKG file which is created
2. After installation, a Finder window will open to the Applications > AVerVision Flash Interface folder:

3. Double click the HTML file “FlashInterfaceSecuritySettings.html” (please note, if you do not have file extensions visible, look under the “Kind” column for the “HTML Document”).
4. Follow the steps listed to allow permissions for the Adobe Flash application to communicate with your document camera:

AVerVision Flash Interface Security Setting Help

You have to grant access to AVerVision Flash Interface before using AVerVision Visualizer. If you are NOT seeing "Connecting..." or live image on the left side of the page, it means that the Flash Interface does not have permission to use AVerVision Visualizer yet. Please follow the instructions below to grant access.

1. Click the AVerVision Interface. If no response when clicking, right-click the Interface and choose **Settings...**
2. Click **Allow** radio button and make sure **Remember** check box is checked in Adobe Flash Player Settings dialog box.
3. Click **Close** button to close the dialog box.
4. The Flash Interface should show either "Connecting..." or live image now. If not, please contact support for assistance
5. Now you are ready to use the Flash Interface in 3rd party software.

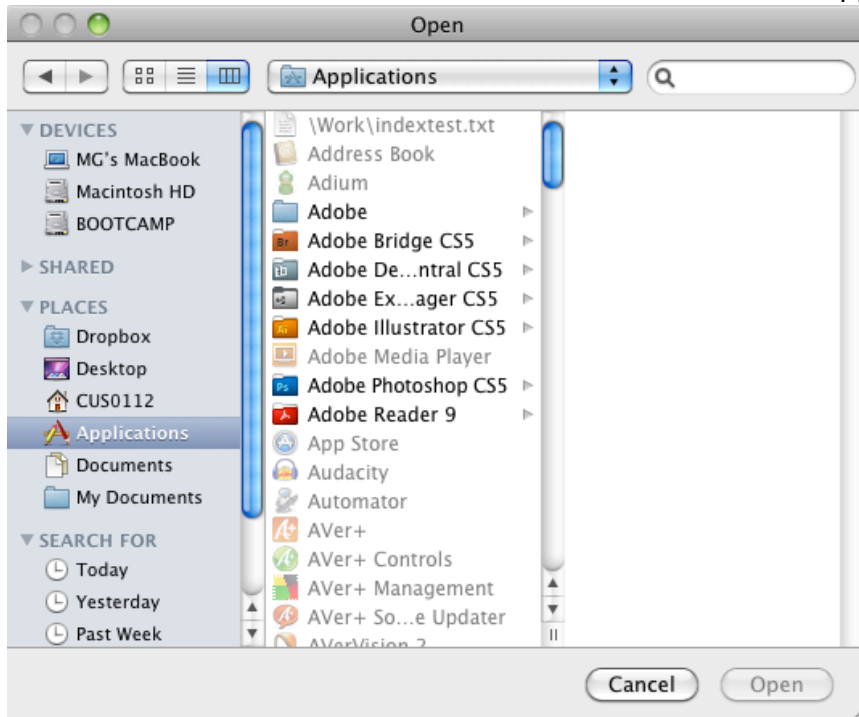

Copyright 1991-2010, AVerMedia All Rights Reserved.

5. Launch Mimio Notebook software.

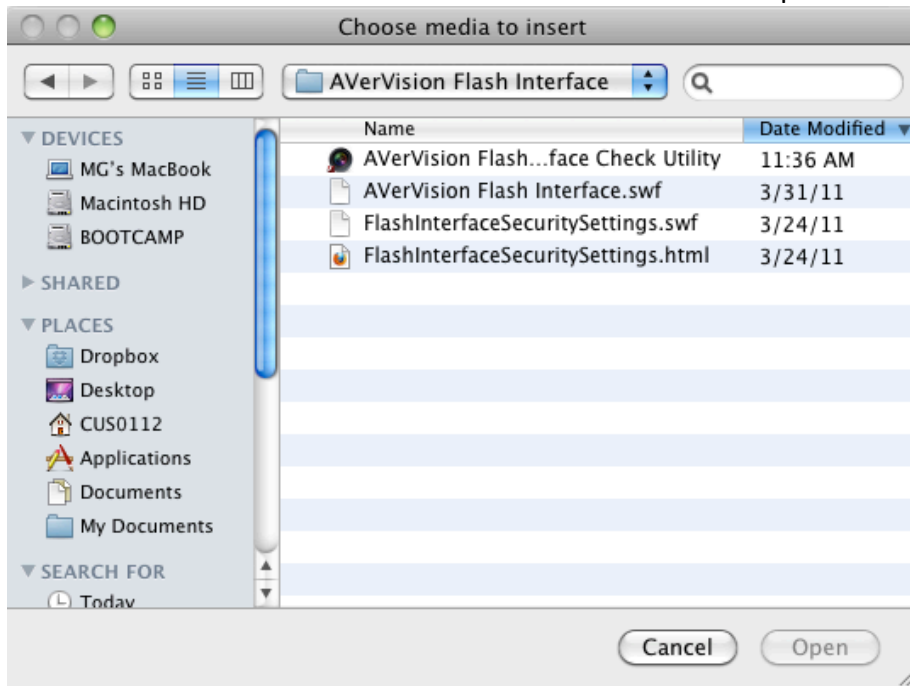

6. Go to the top menu and select Insert > Import File

7. Locate the "AVerVision Flash Interface" folder which is under "Applications"

8. Select the “AVerVision Flash Interface.swf” file and select Open.

9. Click Open
10. The Flash application will appear above the workspace:

11. The controls in the lower portion (you must mouse over the portion for them to appear) of the application are for the following (where supported by your AVer document camera): Auto focus, zoom in/out, rotate, pause, mirror, brightness higher/lower.

12. You can resize the document camera video from the lower right corner as you would any other object
13. That's it! You can now annotate over the object and use it as you would any video object.

If you encounter any issues with the above steps, run the AVerVision Check Utility and confirm that the camera is properly connected and toggled to the PC mode. Both of these tools are available in the Applications folder under "AVerVision Flash Interface".
