

## How to Use the AVerVision Flash Plug-in with SMART Notebook (Mac)

- 1. Install the AVerVision Flash Plug-in by double clicking the zip file, then double click the "AVerVision Flash Plug-in for Mac" MPKG file which is created
- 2. After installation, a Finder window will open to the Applications > AVerVision Flash Plugin folder:

00	🚞 AVerVision Flash Int	terface

V DEVICES     Macintosh HD     BOOTCAMP      SHARED      PLACES      VSEARCH FOR     Orday     Yesterday     Searchay     Past Week     All Images     All Movies     All Documents	Name AVerVision Flash Interface Check Utility VerVision Flash Interface.swf FlashInterfaceSecuritySettings.html FlashInterfaceSecuritySettings.swf	Date Modified Today, 11:36 AM Mar 31, 2011 7:59 PM Mar 24, 2011 12:24 AM Mar 24, 2011 12:24 AM	Size v Kind 426 KB Application 37 KB Adobeument 4 KB HTMLument 4 KB Adobeument		
1 of 4 selected, 13.55 GB available					

- 3. Double click the HTML file "FlashInterfaceSecuritySettings.html" (please note, if you do not have file extensions visible, look under the "Kind" column for the "HTML Document").
- 4. Follow the steps listed to allow permissions for the Adobe Flash application to communicate with your document camera:

5. Launch SMART Notebook software.

6. Go to the top menu and select Insert > Flash File...

	Cancel	) Open					

- 9. Click Open
- 10. The Flash application will appear above the workspace:

- 11. The controls in the lower portion (you must mouse over the portion for them to appear) of the application are for the following (where supported by your AVer document camera): Auto focus, zoom in/out, rotate, pause, mirror, brightness higher/lower.
- 12. You can resize the document camera video from the lower right corner as you would any other object

13. That's it! You can now annotate over the object and use it as you would any video object.

If you encounter any issues with the above steps, run the AVerVision Check Utility and confirm that the camera is properly connected and toggled to the PC mode. Both of these tools are available in the Applications folder under "AVerVision Flash Plug-in"

For faster access to the AVerVision Flash Plug-in you can create a shortcut from within SMART Notebook by following these steps:

1. Open the Content Gallery by clicking the picture frame icon on the left hand side

2. Click the down arrow beside "My Content" and select "Add New Content"

↔	Libraries Computer Network File name: Files of type:	II All Gallery Files		, Open Cancel	

3. Select the AVerVision Flash Plug-in flash file from your desktop shortcut

4. Now the AVerVision Flash Plug-in will be shown in the "My Content" folder of your gallery, where you can simply drag and drop it into the lesson plan.
