About AVer

AVer's legacy in technology began with the founding of AVerMedia Technology in 1990. In January 2008, AVer Information Inc. was established as a spin-off from AVerMedia Information, Inc., with a focused mission to transform education through innovative technology. Today, AVer is a leading provider of award-winning EdTech solutions that enhance student-teacher engagement and improve learning outcomes. Our products are built to support both in-class instruction and hybrid or distance learning environments. From cutting-edge document cameras and AI-powered classroom cameras to smart charging carts and instructional audio systems, AVer offers powerful, easy-to-use solutions for today's K–12 classrooms.

Why AVer

From the moment your partnership with AVer begins, we are dedicated to providing you with exceptional solutions combined with best-in-class service, support and relevant classroom resources in order to ensure our products have the maximum impact to your lesson delivery and your student reception. From free on-site professional development, to webinars, training videos, and even lesson plan resources, AVer helps to enhance your classroom applications of our products. Combined with free US-based, live phone, email and chat technical support, AVer has you covered from start to finish.

"I would definitely recommend AVer products strongly for any school district. It has been one of the most valuable investments Harmony has made."

DOCUMENT CAMERAS

Ready for In-Class or Hybrid Instruction

" The cameras I've had in my class before were bulky, and you wouldn't even think to take them from your classroom to go home with them, but now with my AVer Doc Cam, if there is another quarantine and the school does shut down again, the two items I'm going to take are my laptop and my AVer Document Camera. "

$2x^2 + 3x - 5 = 0$

Solve for x

1. Subtract 3x + 5 from both sides:
   $2x^2 = -3x + 5$

2. Subtract 5 from both sides:
   $2x^2 - 3x - 5 = 0$

3. Divide both sidetr'ly
   $x^2 - \frac{3}{2}x - \frac{5}{2} = 0$

$2x^2 + 3x - 5 = 0$

ARTIFICIAL INTELLIGENCE (AI) AUTO TRACKING CLASSROOM CAMERAS

Automatic PTZ Cameras to Support Real-Time Virtual Instruction

"After looking at other tracking camera equipment, the AVer Auto Tracking did not rely on audio, so if I moved over 'here' the other camera waited until I spoke before it found me. We decided that the camera with the best AI tracking module would give us the most flexibility we needed for various and unforeseen scenarios."
