

TR530/320 Tracking Camera Quick Start Guide

Package Contents

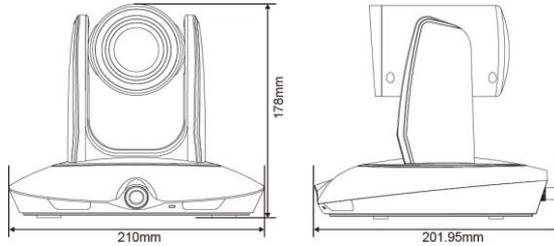

Overview

- | | | |
|---------------------|------------------------------|---------------------------|
| 1. PTZ camera | 9. RS-232 port | 17. Zoom in/out |
| 2. Panoramic camera | 10. Power jack | 18. Exposure compensation |
| 3. Power indicator | 11. Camera select | 19. Home position |
| 4. RJ-45 port | 12. Enter | 20. Tracking on/off |
| 5. 3G-SDI 2 port | 13. Camera direction control | 21. Number buttons |
| 6. 3G-SDI 1 port | 14. White balance | 22. Profile |
| 7. HDMI port | 15. OSD menu | 23. Preset |
| 8. Audio in port* | 16. Back light control | |

*Audio input level: 1Vrms(max.)

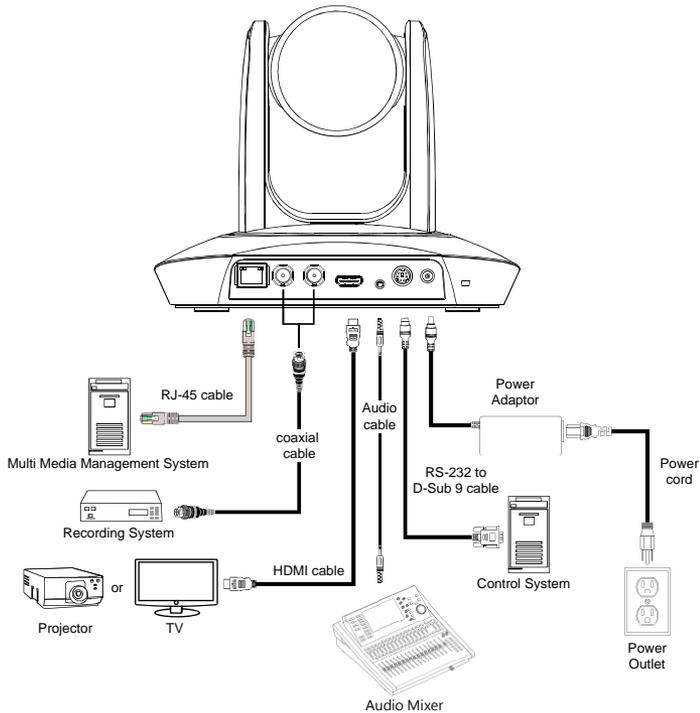

Dimension

Important Camera Setup

Installation Suggestion:

- Install height: 2~3m (6.56~9.84 feet). 2.4m (7.87 feet) is recommended. If the camera height is too low, tracking may be compromised. Please raise the camera to at least 6.56 feet.
- Distance from podium:
 - TR320: 4~10m (13~33 feet)
 - TR530: 4~15m (13~49 feet)

Setup IP Address

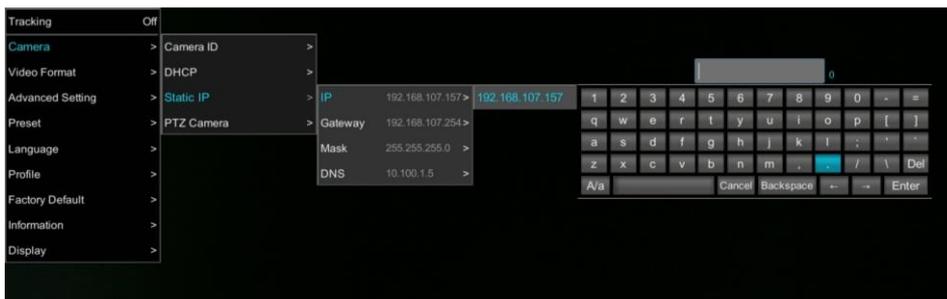

There are two ways to setup IP address of the camera. Please follow the steps below to setup the IP address.

■ Static IP Address

1. After starting-up, press  button on remote control to call setup menu.
2. Use ▲ and ▼ buttons to select the **Camera > Static IP > IP**, then press ► button to enter IP address.

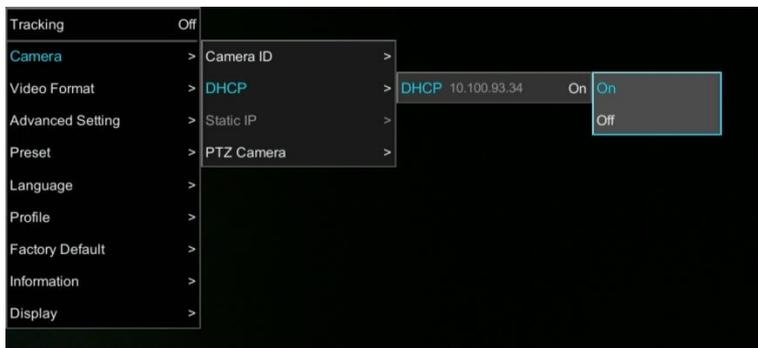

[Note] If DHCP is on, please turn off DHCP before setup static IP address. Go to **Camera > DHCP > DHCP > Off**.

3. To setup gateway and DNS, use ▲ and ▼ to select “Gateway” or “DNS”. Then, press ► button to enter the value.

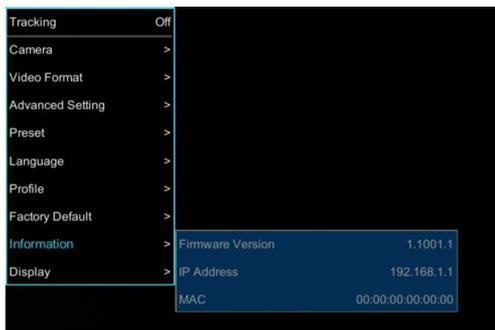

■ Dynamic IP Address

1. After starting-up, press  button on remote control to call setup menu.
2. Use ▲ and ▼ buttons to select the **Camera > DHCP > DHCP > On**, then press ► button to get IP address from local DHCP server.

3. Use ▲ and ▼ buttons go to “**Information**” to check the IP address information.

Camera Setup Guide

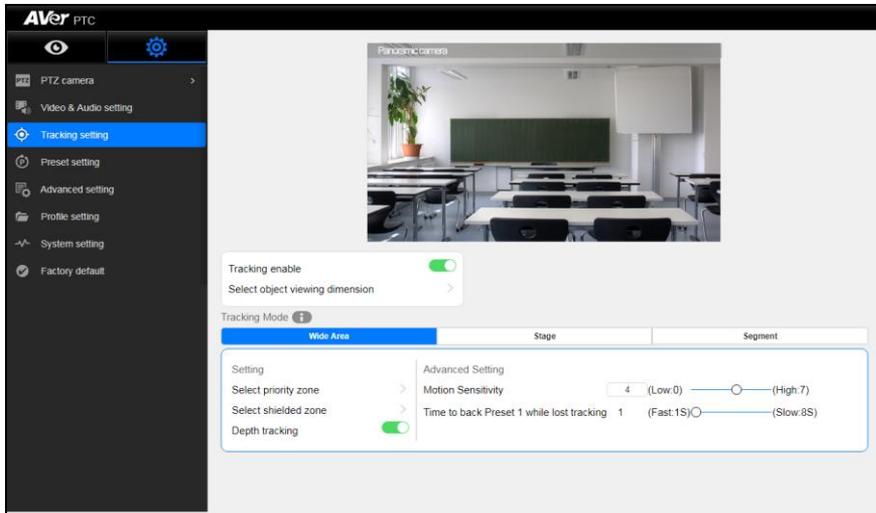

- For the best experience, we recommend using the Google Chrome browser to access the camera. If you have difficulty getting proper browser response, please clear the browser cache first.
- If you are having problems accessing the camera login page or having intermittent video streaming problems on your browser please upgrade the firmware on the camera to the latest version:
<https://www.averusa.com/pro-av/support/> (Selecting Firmware)
- More information and FAQs can be accessed from this site: <https://averusa.force.com/support/s/>

Visit “How to video” by scanning QR code or via URL:

or <https://youtu.be/sUIINz-x5qQ>

After login the web interface (password: **admin**), select  to start setup.

AVer TR530 is a professional tracking camera which supports 3 tracking methods, namely: wide area, stage or segment mode. The TR530 uses body motion and image analysis algorithm to track the intended target; the target subject does not need to wear any signal transmitting device.

Tracking mode instructions			
	Wide area	Stage	Segment
Introduction	Accurately track a chosen target anywhere in a crowd.	Track target in all lighting conditions with high accuracy.	Tracking by segment: stay fixed on one area until target moves to next area.
Features	The person tracking function captures every movement.	Horizontal continuous high-accuracy target tracking.	Track up to 4 fixed locations based on target's position.
Mostly used for	<ul style="list-style-type: none"> Classrooms Presenters moving through a crowd. 	<ul style="list-style-type: none"> Stage presentations Stage performances Target projectors behind 	<ul style="list-style-type: none"> After school podium. Classroom podium. Multiple panels need to be displayed.

MODE INTRODUCTION

Wide Area Mode

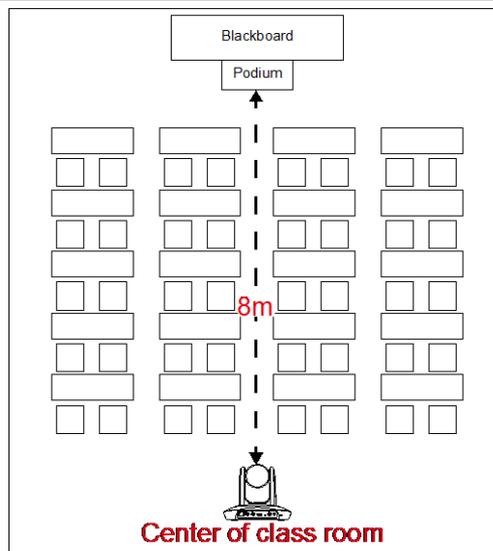

❖ Application

- This mode is suitable for teacher or lecturer tracking in normal classroom. The algorithm is based on face detection.
- Regardless of the target close to or away from TR530, the tracking camera will automatically zoom in/out to maintain the appropriate size and proportion.
- If the tracking target is locked, TR530 will not be affected by the other moving objects.

❖ Limitation

- This mode is easily affected by the brown objects or the color similar to skin. Things like cartons and wood furniture.
- It should be used in a brightly lit environment. If the light level is not enough, it may not be able to properly track the object.
- It should not be used in an environment with high bright contrast. For example, the environment with lots of IFP or projectors in the background. When the target enters or leaves the high bright contrast zone, the TR camera may not be able to track the object properly.

- **Install height range (from floor):** 2 ~ 3m; **2.4m** is suggested.
- **Distance range to podium:** 4~15m; **8m** is suggested.
- **Position:** Center of class room.

Stage and Segment Mode

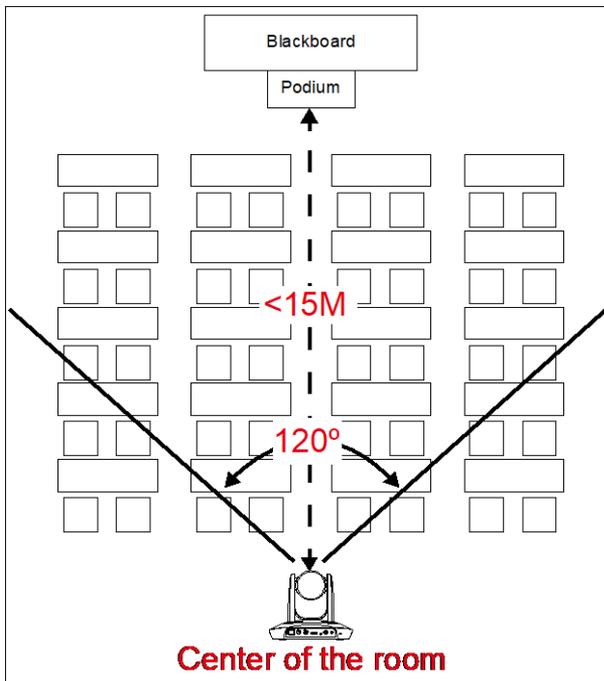

✧ Application

- It's suitable for a more complicated environment due to the utilization of the absolute motion tracking algorithm. The TR530 will not be affected by the color of wood furniture or any high bright contrast background.
- Suitable for only one person in the tracking zone.

✧ Limitation

- Tracking is only available for horizontal movement. It will not auto zoom in/out for target close to or going away from the TR530
- Due to absolute motion tracking, it is unable to check who the target is or who the interference is. It does not have anti-interference ability.
- Due to the FOV limitation, the tracking zone is only available within the 120 degrees provided by the panoramic camera.
- Distance limitation <15M

- **Install height range (from floor):** 2 ~ 3m; **2.4m** is suggested.
- **Distance range to podium:** 4~15m; **8m** is suggested.
- **Position:** Center of the room.

Hot Key

Press certain button on remote controller to perform hot key function.

Button	Action	Function
	Press and hold(3secs)	Power on/off camera. [Note] Only support at TR530 FW version 0.0.1000.08 and above.
3	Press three times(333)	Enable/Disable tracking function When the hot key takes effect, you will see “tracking on” or “tracking off” on the right bottom side.
6	Press six times(666666)	Enable/Disable AVer Logo When the hot key takes effect, you will see “AVer” logo on the right bottom side.
7	Press seven times(7777777)	Show the tracking indicator When the hot key takes effect, you will see the tracking indicator on the target face. This mode only works in PIP Mode 2.
8	Press eight times(88888888)	Set TR530/320 IP address as default IP(192.168.1.168.)
9	Press nine times(999999999)	Password Reset mechanism: When the hot key takes effect, the password of entering Web UI will go back the default “admin”.
